

## ENVIRONMENTAL POLICY

The General Direction of **Falci Srl** declares that the Environmental Management System, as described in the Supplementary Manual and in the procedures deriving from it, has the purpose to satisfy the most important mandatory environmental requirements (regulations, laws and dispositions) and preserve health and safety at work and the surrounding environment.

The Environmental Policy which is based on the following points:

1. To respect all the applicable and current legislative regulations related to the most significant environmental aspects which have been identified;
2. To rationalize the use of the natural and energetic resources;
3. Promote proper waste management oriented to reduction, recycling and reuse.
4. Ensure the involvement of all workers, at any levels, in order to increase awareness, responsibility, leadership and active collaboration to ensure an improvement of the Management System and the achievement of its objectives
5. To guarantee a continuous maintenance of equipment in order to respect the regulations on the restraint of pollutants with a commitment on the continuous improvement and on the pollution's prevention.
6. Train and make aware the internal personnel on the use of PPE and assure the respect of safety and environment rules adopted by falci;
7. To effectuate a no-stop control on the production process and to monitor all the related environmental aspects/impacts;
8. To sensitize both the internal and external parts on the contents of the environmental policy;

The present Environmental Policy is communicated to all personnel at all level within the organization, and all personnel must actively cooperate to pursue and monitor the application of the above.
